PROFESSIONAL SUMMARY

Desktop Support Technician and Cloud Engineer with experience delivering Tier 1/Tier 2 support and cloud operations in enterprise environments. Skilled in Windows, macOS, Linux, Microsoft 365, Active Directory, Entra ID, AWS, endpoint management, networking, and automation. Known for resolving incidents efficiently, maintaining SLA compliance, and partnering with infrastructure, network, and security teams.

WORK EXPERIENCE

Datara INC, TX , USA.

Software Engineer | Cloud Engineer

Dec 2025 – Present

Responsibilities:

- Supported Windows and Linux servers, desktops, and enterprise applications across production environments, ensuring system availability and operational reliability.
- Provided Tier 2 technical support for hardware, software, operating system, network, VPN, and application-related issues, performing root cause analysis to minimize downtime.
- Managed user accounts, access permissions, and authentication using Active Directory, Microsoft Entra ID (Azure AD), and AWS IAM.
- Developed automation scripts using PowerShell, Python, and Bash to streamline system administration, software deployment, and operational tasks.
- Deployed and supported AWS infrastructure, including EC2, VPC, S3, IAM, RDS, CloudWatch, Route 53, Auto Scaling, and Elastic Load Balancing.
- Built and maintained CI/CD pipelines using Jenkins and GitHub Actions and automated infrastructure provisioning with Terraform, CloudFormation, and Ansible.
- Configured security controls, including IAM policies, security groups, network ACLs, encryption, and least-privilege access controls to strengthen cloud security.

Skills: AWS, Azure, Terraform, CloudFormation, Docker, Kubernetes, Jenkins, GitHub Actions, Python, Bash, Linux, SQL, CI/CD, Cloud Security, CloudWatch, Prometheus, Grafana

SMART & CREATIVE SOLUTIONS GROUP, London, UK.

Software Engineer | Cloud Engineer

Dec 2019 – Jun 2023

Responsibilities:

- Supported Windows and Linux servers, desktops, and enterprise applications across production environments, ensuring system availability and operational reliability.
- Provided Tier 2 technical support for hardware, software, operating system, network, VPN, and application-related issues, performing root cause analysis to minimize downtime.
- Managed user accounts, access permissions, and authentication using Active Directory, Microsoft Entra ID (Azure AD), and AWS IAM.
- Developed automation scripts using PowerShell, Python, and Bash to streamline system administration, software deployment, and operational tasks.
- Deployed and supported AWS infrastructure, including EC2, VPC, S3, IAM, RDS, CloudWatch, Route 53, Auto Scaling, and Elastic Load Balancing.
- Built and maintained CI/CD pipelines using Jenkins and GitHub Actions and automated infrastructure provisioning with Terraform, CloudFormation, and Ansible.
- Configured security controls, including IAM policies, security groups, network ACLs, encryption, and least-privilege access controls to strengthen cloud security.

Skills: AWS, Azure, Terraform, CloudFormation, Docker, Kubernetes, Jenkins, GitHub Actions, Python, Bash, Linux, SQL, CI/CD, Cloud Security, CloudWatch, Prometheus, Grafana

EDITPOINT (OPC). Pvt. LTD, Hyderabad, INDIA

Desktop Support Technician

Aug 2016 – May 2019

Provided Tier 1 and Tier 2 desktop support to over 300 end users in a Windows enterprise environment, delivering timely technical assistance for hardware, software, network, and Microsoft 365 issues while maintaining high customer satisfaction and meeting service level agreements (SLAs).

Responsibilities:

- Installed, configured, upgraded, and maintained Windows 10/11 workstations, Microsoft Office, Microsoft 365, Outlook, Teams, OneDrive, and SharePoint.
- Administered Active Directory user accounts, password resets, group memberships, account unlocks, and access permissions.
- Diagnosed and resolved hardware, software, operating system, printer, VPN, email, and network connectivity issues.
- Managed incidents, service requests, and change requests using ServiceNow while meeting established SLA targets.
- Maintained IT asset inventory, hardware lifecycle records, software licensing, and equipment deployment documentation.

SKILLS

Technical Skills

- **Desktop & End-User Support:** Tier 1/Tier 2 Support, IT Help Desk, Remote Support, Incident & Request Management, ITIL
- **Operating Systems:** Windows 10/11, Windows Server, macOS, Linux
- **Microsoft Technologies:** Microsoft 365, Office, Outlook, Teams, OneDrive, SharePoint, Active Directory, Entra ID, Group Policy
- **Hardware & Software:** Deployment, Imaging, Troubleshooting, Printers & Peripherals, Device Setup
- **Networking:** TCP/IP, DNS, DHCP, VPN, Wi-Fi, LAN/WAN, RDP
- **Endpoint Management:** Intune, SCCM, JAMF, Patch Management, Endpoint Protection
- **Ticketing Systems:** ServiceNow, Jira Service Management, Zendesk, Remedy
- **Cloud Technologies:** AWS (EC2, IAM, S3), Azure, Microsoft 365 Administration
- **Security:** MFA, IAM, BitLocker, Microsoft Defender, Endpoint Protection
- **Scripting & Automation:** PowerShell, Bash, Python
- **Monitoring & Diagnostics:** CloudWatch, Prometheus, Grafana, ELK, Wireshark, Log Analysis
- **Professional Skills:** Troubleshooting, Root Cause Analysis, Communication, Documentation, Asset Management, Collaboration

EDUCATION

ROBERT MORRIS UNIVERSITY, Pittsburgh, PA

May 2025

Master of Science (Major in Cybersecurity)

UNIVERSITY OF MADRAS, Chennai, INDIA

April 2016

Bachelor of Science (Computer Science)

PROJECTS

KubeForge — Kubernetes Cluster Qualification & Reliability Framework

Independent DevOps Project | In Development

Technologies: Kubernetes, AWS EKS, Terraform, Python, GitHub Actions, Docker, Helm, Prometheus, Grafana, OpenTelemetry

- Developing an automated Kubernetes qualification framework that provisions, tests, validates, and destroys clusters before production deployment.
- Building reusable validation suites for cluster health, DNS, networking, storage, scheduling, autoscaling, RBAC/IAM, security, and workload readiness.
- Automating AWS EKS lifecycle workflows with Terraform to create ephemeral environments, run tests, report results, and safely destroy resources.
- Designing CI/CD quality gates and controlled resilience tests for recovery, rescheduling, and service availability.

AegisForge — DevSecOps & SOC Automation Platform

Technologies: Python, FastAPI, React, PostgreSQL, Docker, Kubernetes, Terraform, AWS, GitHub Actions, Nmap, SIEM, MITRE ATT&CK

- Developing a full-stack DevSecOps and SOC platform that centralizes infrastructure automation, CI/CD, monitoring, detection engineering, and incident management.
- Built Nmap-based asset and service discovery with PostgreSQL storage for centralized infrastructure visibility.
- Developed a SIEM-style event pipeline with configurable detections, including SSH brute-force thresholds and automated alerts.
- Mapped detections to MITRE ATT&CK and built FastAPI workflows for alert severity, investigation, and remediation tracking.
- Integrating Terraform, Docker, Kubernetes, and CI/CD with a React operations dashboard for assets, vulnerabilities, alerts, incidents, and deployments.

CERFITICATIONS

Certified Ethical Hacker (CEH) – EC-Council
CCNA – Pursuing
